Education for Sustainable Development and Global Citizenship Policy ESDGC

At Ysgol _____ we recognise that Education for Sustainable Development and Global Citizenship prepares pupils for life in the Twenty First Century. ESDGC needs to be embedded into the curriculum and all aspects of school life, helping to create an ethos of responsibility on the local, national and global scale.

Education for Sustainable Development helps our pupils to develop the knowledge and skills to make informed decisions about the way we live our lives, and to improve our quality of life whilst protecting the planet for future generations.

Education for Global Citizenship enables our pupils to understand the values and skills to help us make decisions which promote an equitable and sustainable world.

Eco-Code

E - Everyone is responsible for the environment of the school and its grounds

A - Always put litter in a bin

R - Reduce, reuse and recycle

T - Turn off lights, taps and electrical equipment (e.g. computers, screens and printers)

H - Help us to become responsible global citizens.

In order to educate our pupils and staff in sustainable and global issues our Eco Council are active in ensuring that the above is visible around the school e.g. through our Eco Council notice board and numerous posters around the school focusing on our use of energy and how we look after our environment e.g. rubbish disposal.

Within the ACCAC guidance Education for Sustainable Development and Global Citizenship (2002) nine key concepts are outlined. We endeavour to promote the concepts in the following ways:

1. **Through the Curriculum:** Although all subjects contributes to the development of ESDGC within their learning plans, we have prioritised the contribution of key subject such as Geography, Science and PSHE.

POLISI DATBLYGU CYNALIADWY / SUSTAINABLE DEVELOPMENT POLICY

2. **Environment and Community Links:** We will continue to develop links and partnerships with organisations such as Eco Schools, Fair-trade Schools and Healthy Schools. This will help us to encourage responsible stewardship which will raise the profile of ESDGC within school.
3. **Involving all stakeholders in contributing to and evaluating our ESDGC provision:** Eco Council, School Council and all pupil forums, community and LA partners, Leaders at all levels, teachers and support staff, governors and parents
4. **Global and Community links nurtured:** We will seek to make links with other schools - primary schools, secondary schools and schools within other countries.
5. **Resources:** We will endeavour to recognise and develop a vast variety of resources and information sources that we can draw from within the school. In addition we encourage pupils to evaluate resources to ensure that they represent a balanced view of the world.
